

# Objects

**Directions:** Roll two ten-sided dice and re-roll any "0"s. Read the resulting roll as a 2 digit number (an 8 and a 4 become 84). Then use the table below to randomly select a unique object to include in your short story. The tens place is vertical and the ones place is horizontal, so 38 would be read as 3 down and then 8 across, thus producing "A floating body" as your result.
